

3D asymmetry (CDM, $z = 0.5$)

$$A = \sum |I_{i,j,k} - I'| / \sum |I_{i,j,k} + I'|, \quad I' = I_{-i, -j, -k}$$

$$A_{\text{noise}} = (2/\sqrt{\pi}) \sigma N / \sum |I_{i,j,k} + I'|$$
